Change Management Plan:Roles

By: Andy Liang, Tommy Works, Anthony Chieng, Bryam Ochoa, Luis Sanchez, Emily Perez, Giovanni Chumpitazi

Strategic Level

Product Manager: Andy Liang

- Collaborates with Product Owners to define product vision, roadmap, and priorities.
- Provides guidance on architecture and technical direction.
- Reviews high-level change proposals and ensures alignment with strategic objectives.
- Identify customer needs and areas of improvement

Architect: Anthony Chieng

- Defines system architecture and technical standards.
- Reviews change proposals for potential architectural implications and dependencies.
- Provides technical guidance and expertise to Agile teams.
- You would be in charge of choosing the stack of software and systems we will be using to build our app
- You will need to research technical standards and best practices along with the best technologies to build our app with

Agile Team Level

Product Owner: Giovanni Chumpitazi

- Represents the customer voice and prioritizes changes within the team backlog.
- Collaborates with the Scrum Master and Dev Team on change implementation.
- You decide what comes in and out of the backlogs.
- You own the product backlog and envision yourself being the customer and help direct features and directions the app should go. Change priority of backlogs to reflect product vision and roadmap

Scrum Master: Bryam Ochoa

- Work with dev team, address obstacles in backlog, and promote continuous improvement
- Effective communication with dev team and product owner so that any changes in the backlog is transparent and everyone is aware of any changes.
- Will be the one that leads the weekly meetings and supports the product owner to manage backlog efficiently

Dev Team: Jay Chow, Tommy Works, Luis Sanchez

- Implements changes according to user stories and acceptance criteria.
- Conducts in testing for the application
- Provides feedback to the Product Owner and Scrum Master on change feasibility and potential issues.
- You will be a team of coders that will be working on a specific feature of the app during a sprint

Key Reminder

- Roles subject to change
- Rotation will take place every 1-2 weeks so that everyone can experience the responsibilities of each role
